ELSEVIER

Journal of Statistical Planning and Inference 59 (1997) 385–386

journal of statistical planning and inference

Author Index Volume 59 (1997)*

Alam, K. and Z. Feng, Estimating probability of occurrence of the most likely multinomial event (2) 257–277
Basu, A.P., *see* C. Mukhopadhyay (1) 79–100
Boshuizen, F.A., A replacement model with general age-dependent failure rates (2) 213–228
Boukai, B. and J. Sarkar, Sequential confidence intervals with fixed-proportional accuracy for the mean of NEF-PVF distributions (2) 241–256
Cheng, C. and E. Parzen, Unified estimators of smooth quantile and quantile density functions (2) 291–307
Datta, S. and T.N. Sriram, A modified bootstrap for autoregression without stationarity (1) 19– 30
Feng, Z., *see* K. Alam (2) 257–277
Greenshtein, E. and E. Torgersen, Statistical information and expected number of observations for sequential experiments (2) 229–240
Hutson, A.D., *see* G.S. Mudholkar (1) 61– 78
Lindsey, J.K., Stopping rules and the likelihood function (1) 167–177
Lyazrhi, F., Bayesian criteria for discriminating among regression models with one possible change point (2) 337–353
Marchette, D.J., *see* C.E. Priebe (1) 45– 60
Markiewicz, A., Properties of information matrices for linear models and universal optimality of experimental designs (1) 127–137
Martin, R.J., A three-dimensional unilateral autoregressive lattice process (1) 1– 18
Miller, A.J., *see* N.-K. Nguyen (2) 379–389
Morgan, J.P. and N. Uddin, Orthogonal sets of balanced incomplete block designs with nested rows and column (2) 369–378
Mudholkar, G.S. and A.D. Hutson, Continuity corrected approximations for and 'exact' inference with Pearson's X^2 (1) 61– 78
Mukhopadhyay, C. and A.P. Basu, Bayesian analysis of incomplete time and cause of failure data (1) 79–100
Nguyen, N.-K. and A.J. Miller, 2^m fractional factorial designs of resolution V with high A-efficiency, $7 \leqslant m \leqslant 10$ (2) 379–389
Niyonsenga, T., Response probability estimation (1) 111–126
Oman, S.D., A remark on testing covariance structure in a mixed model (2) 355–357
Parzen, E., *see* C. Cheng (2) 291–307
Paul, S.R., *see* K. Thiagarajah (2) 279–289
Pesotan, H., *see* B.L. Raktoe (1) 163–165
Priebe, C.E., D.J. Marchette and G.W. Rogers, Semiparametric nonhomogeneity analysis (1) 45– 60
Purohit, S.G., Recurring event data: A general model and related inference procedures (1) 31– 44
Raktoe, B.L. and H. Pesotan, Note On Draper and Lin's article "capacity considerations for two-level fractional factorial designs" (1) 163–165
Rogers, G.W., *see* C.E. Priebe (1) 45– 60
Rosenberger, W.F. and T.N. Sriram, Estimation for an adaptive allocation design (2) 309–319
Ruszinkó, M. and G. Tardos, On a search problem in multidimensional grids (1) 101–109
Sarkar, J., *see* B. Boukai (2) 241–256
Sebastiani, P. and R. Settimi, A note on D-optimal designs for a logistic regression model (2) 359–368

*The issue number is given in front of page numbers
